Krakow is one of the largest academic centres in Poland since nearly 200,000 young people study at 31 universities and academies here. It is a city of science, art and culture, the real gem of the region and one of the most famous and recognizable cities in the world. Dynamically developing air connections, the unforgettable atmosphere and a great potential of hospitable and open-minded inhabitants make Krakow an attractive and unique place.

The AGH University of Science and Technology (AGH UST) is located within walking distance of the city centre as it takes fifteen minutes to get from its premises to the Main Market Square and the adjacent streets where a visitor may find many theatres, museums, pubs and restaurants.

The Royal City of Krakow guarantees the unforgettable ambience and experience:
> the unique atmosphere of our beautiful city - Krakow is included in the UNESCO World Heritage List
> Krakow’s convenient location - the airport and connections with major European cities
> wonderful atmosphere of an academic centre – numerous universities, student festivals and cultural events, cabarets
> the mountains situated in the vicinity of Krakow – mountain trips and skiing
> theatres, cinemas and museums
> modern shopping centres and multiplexes
> student clubs, cafes, pubs, restaurants
> sport facilities: swimming pools, tennis courts, football pitches, a white-water canoening course (one of the best in Europe), golf courses, climbing walls, etc.
> impressive events and performances of famous stars – the Coke Live Festival, the Sacrum-Profanum Festival with events held in post-industrial venues, Kraftwerk, the Music in Old Cracow Festival, Timbaland, Ennio Morricone, the Wianki Summer Solstice Festivity, the Misteria Paschalia Easter Festival, The International Festival of Short Films, and others
> the Museum of Aviation with its extraordinary aircraft collection

Post-graduate studies:
AGH UST offers more than 90 post-graduate disciplines aimed at both engineers (ceramics, electrical engineering, electrical power, gas engineering, geodesy, geophysics, mining, computer science, telecommunication, metallurgy, robotics, biomedical and financial engineering) and people who are interested in obtaining a new specialization in computer science and computer graphics, environmental protection, public procurements, work safety, estate evaluation and management, human resources management, company management, quality management, EU funds management and education management.

Doctoral studies:
12 faculties are entitled to confer the doctor’s degree in:
> technical sciences
> chemical sciences
> physical sciences
> earth sciences

in the following disciplines: automatics and robotics, biocybernetics and biomedical engineering, chemical technology, chemistry, computer science, electronics, electrotechnics, energy engineering, environmental engineering, geodesy and cartography, geology, geophysics, machinery construction and exploitation, materials engineering, mechanics, metallurgy, mining and geoengineering geology, physics, telecommunication.
AGH University of Science and Technology

The Department of International Relations offers students the following options:

- attractive scholarships and stays abroad (the AGH UST has signed about 600 agreements with the colleges and universities all over the world)
- the participation in the Erasmus Lifelong Learning Programme (lasting for one or two semesters)
- placements abroad in renowned companies
- summer courses (student groups from the USA and Mexico)
- professional assistance and advice on the choice of the appropriate scholarship scheme
- information and promotional meetings
- cooperation with such student associations as BEST, ESN AGH, IAST and BLAET, all involved in establishing international exchanges and Blizzard
